

KT135 Remote On/Off ignition switch with E-Lock control for Ducati Panigale track bikes. 899 / 959 / 1199 / 1299

This assembly allows the complete removal of the aluminium ignition switch barrel and steering lock, yet still retains all of the control features this bike needs:

- E-Lock immobiliser retained via normal key use
- Timed shut down of the power circuits

The remote sealed switch assembly fits onto the existing ignition mounts to give a simple and intuitive Push to ON > Push to OFF activation.

<p>KT135 Components</p> <ul style="list-style-type: none"> • Control module • Sealed ON/OFF switch with housing • Mounting screws • Plug n Play wiring loom 	<p>KT135 assembled with your E-Lock</p> <ul style="list-style-type: none"> • E-Lock device plugs into our control module • Insert your ignition key and retain with lock wire or cable tie • Plug the assembly into your bike via the standard 6 way connector

Installation notes:

1. Our control module has longer wires than the standard key switch allowing it to be fitted anywhere in the front fairing.
2. Do not mount the control module alongside the engine or any location subject to high ambient heat or electrical interference such as ignition coils or ignition leads.
3. Mount the control module in free circulating air to allow heat dissipation of the aluminium heat sink (55 °c to 60 °c under normal operation).
4. This control module has 3 mounting bolt holes to suit any custom bracket (not supplied)
5. For users who do not want to use our red On/Off switch you can use any push button or toggle switch to simply link the 2 wires together, or we can provide a handlebar mounted on/off switch as seen here on the right – Order KT135B
6. To disable the bike (during shipping) simply remove the key from our control module. The ON/OFF switch will still work but the bike cannot be started.

Electrical / Mechanical Characteristics

Wire..... Type 55 / 22
 Switch sealing IP67
 Housing..... Plastic / Aluminium

Coating..... Black
 Total kit weight 135 g

Ordering Information

Part No.	Connector	Description
KT135A	Plug n Play	Remote On/Off race switch – Red switch in the standard key position
KT135B		Remote On/Off race switch – Red switch mounted on the handlebar
